by Hurst

Welcome to the world of **BOHEMIA**

Stepping away from the standard, we introduce our new Bohemia range, a stunning combination of our most popular design classics with the introduction of new contemporary colours and complimentary hardware.

This fusion of colour and modern, robust furniture brings an avant garde feel to the new range, whilst retaining the security and energy efficiency benefits of our engineered GRP composite door.

The Bohemia range is manufactured to the highest quality standards in accordance with PAS23 and PAS24 weather and security performance standards. We are so confident in the quality of our doors that each one comes with a 10 year manufacturers guarantee, giving you that much needed peace of mind that your new door will look as good in years to come as it does the day it is supplied.

COMPOSITE ECLIPSE – DAMASK RED

WITH BRILLIANCE TWIN GLAZING

The eclipse is a new design brought into the already well established range of our cottage doors. This contemporary addition will certainly make a striking statement of individuality to any home.

Incorporating an automatic multi-point locking system, which operates a slam lock as soon as the door is closed, means that it is no longer necessary to lift the handle to engage the hook locking mechanism.

This contemporary design incorporates German engineered furniture, which is modern, eye catching, practical and functional and the door also features a state of the art automatic locking system, unique to the Bohemia range.

When closing the door, 2 solid anti-push back hooks automatically operate to achieve instant security.
